ACKNOWLEDGEMENT

An Acknowledgement should be an expression of genuine gratitude and not a set of platitudes. Here we pen down the thankfulness. We owe to all those who made this endeavor ours successful. We do not want to miss the opportunity to thank all those who have helped us either directly or indirectly, through their constant guidance, which helped, put in our best.

PREFACE

Welcome to the project report developed by hitesh chaudhary .The project report has been made to make ease of understanding of the website developed for full time project fulfilment in BSC SEM-VI Where project report contains the documentation of project and project presentation.

Here in word document the documentation has been developed including the following things. Intro-page, college certificate (for made project), index, project profile, existing system, need for new system, minimum requirement, system flow-chart, DFD up to first level, entity relationship diagram.The other thing is process description that includes a brief description of the process.Process algorithm, Admin Side Input Design, Customer Side Input Design and at the last Post Implementation Review, Future Enhancement, and Bibliography that gives the reference books and references sites.

INDEX

NO.	TITLE	PAGE NO.
1.	Project Profile	1
2.	About Organization	2
3.	Existing System	3
4.	Need for new system	4
5.	System Requirement	5-6
6.	System Flow Chart	7-10
7.	Data Flow Diagram (DFD)	11-13
8.	Data Dictionary	14-17
9.	ER Diagram	18
10.	Process Description	19
11.	Process Algorithm	20-21
12.	Admin Side Design	22-24
13.	User Side Design	25-29
14	Testing	30
15	Post Implementation Review	31
16	Future Enhancement	32
17	Bibliography	33

Back-end Tool	PHP,MY SQL
Other Tools	CSS, HTML5, BOOTSTRAP
Developed For	Shiv-E-Commerce Pvt. Ltd
Developed At	AMPICS

About Organization

Organization Name	E- Commerce Store
Chairman	Hitesh chaudhary
Address	Mehsana

EXISTING SYSTEM

❑ Limited Product Display:

Products are displayed in static web pages or social media posts, without advanced search or filtering options.

❑ Manual Order Processing:

Orders are often taken through emails, phone calls, or direct messages, leading to errors and delays.

❑ Payment Handling:

Most transactions rely on cash on delivery or manual bank transfers instead of secure online payment gateways.

NEED FOR NEW SYSTEM

❑ Scalability and Flexibility:

The new system can easily handle a growing number of users, products, and orders, making it suitable for future expansion.

❑ Automation of Business Processes:

The new system will automate tasks such as order placement, inventory updates, and invoice generation, reducing manual effort and human error.

❑ Enhanced Communication:

Automated email and SMS notifications keep customers informed about order confirmations, shipping updates, and promotions.

1	User_ID	Int	Foreign Key	ID Info
2	Feedback_ID	Int	Primary Key	Username Info
3	Feedback_Message	Varchar(255)	Not null	Message Info

PROCESS DESCRIPTION

Admin Side

- First Admin Login Into System .
- Admin Manage Category & Products.
- Admin Manage Order.
- Admin View Payments
- Admin Manage Feedback.

User Side

- First User Register & Login Into System.
- User View Category & Products.
- User Add Product To Cart.
- User Give Order.
- User Give Payments.
- User Give Feedback.

PROCESS ALGORITHM

Admin Side

STEPS :

Step 1. Start

Step 2. Enter Admin_Email-id and Password.

Step 3. Check if login is valid

IF invalid → Go to Step 1

ELSE → Proceed to next step.

Step 4. Manage Category (Add, Edit, Delete).

Step 5. Manage Products & Orders .

Step 6. View Payments.

Step 7. Manage User Feedback .

Step 8. Logout

Step 9. Stop

User Side

STEPS :

Step 1. Start

Step 2. User Sign in/Login .

**Step 3. Check if login is valid IF invalid → Go to
ELSE → Proceed to next step .**

Step 4. View Category & Products.

Step 5. Purchase Products.

Step 6. Give Payments.

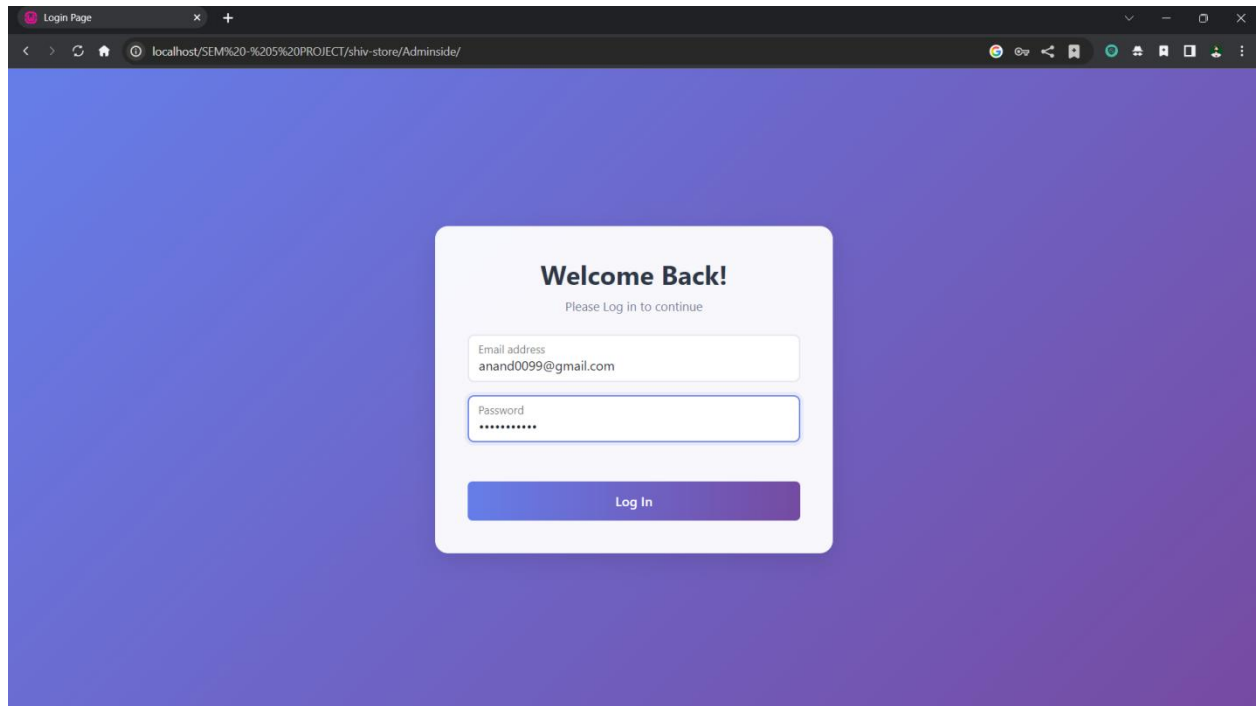

Step 6. Add Feedback .

Step 7. Logout .

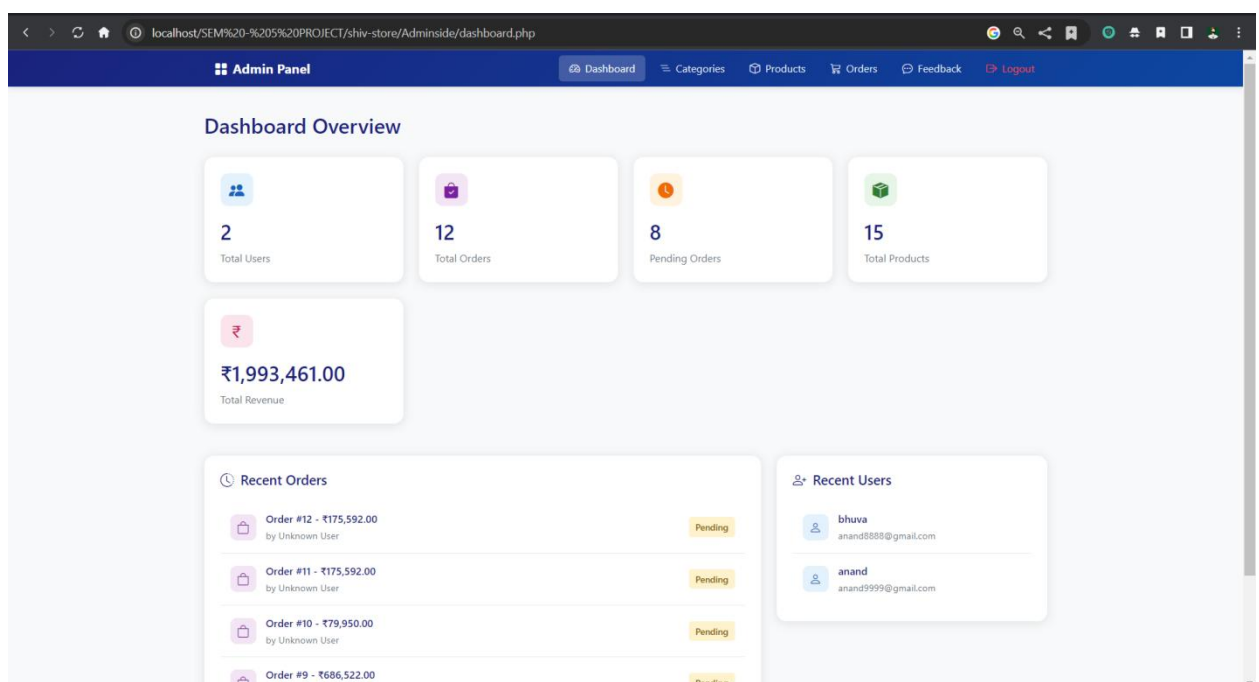

Step 8. Stop .

About-Page

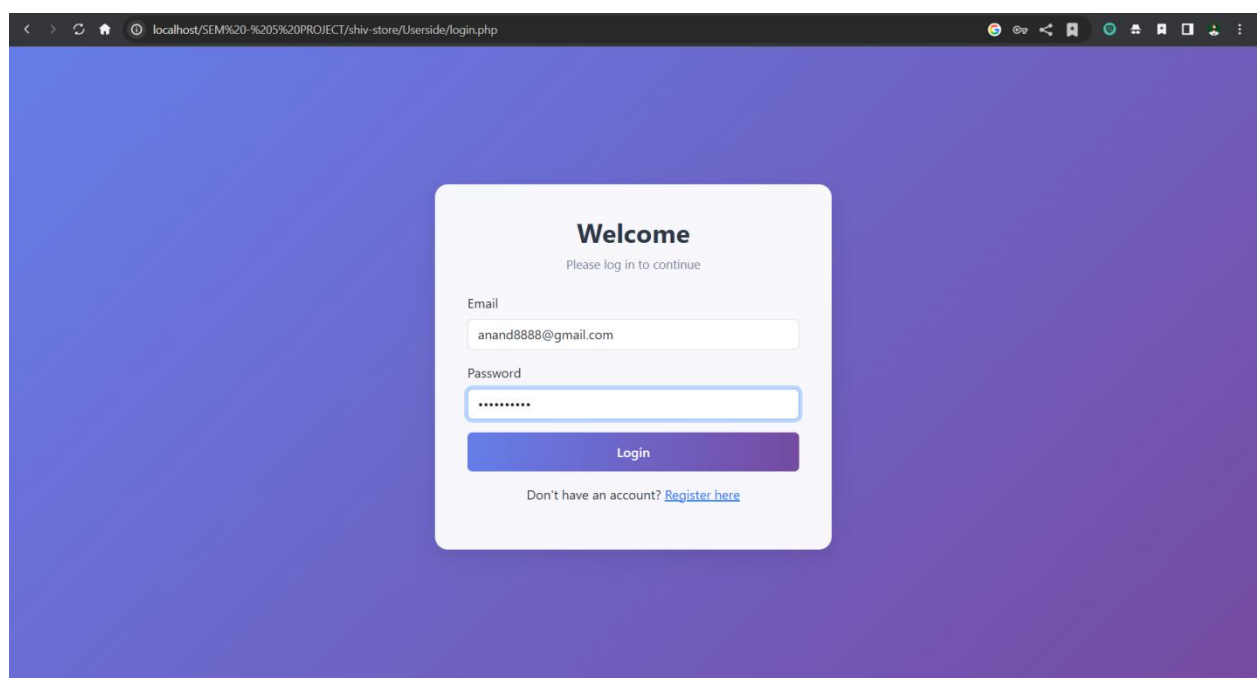

Signin-Page

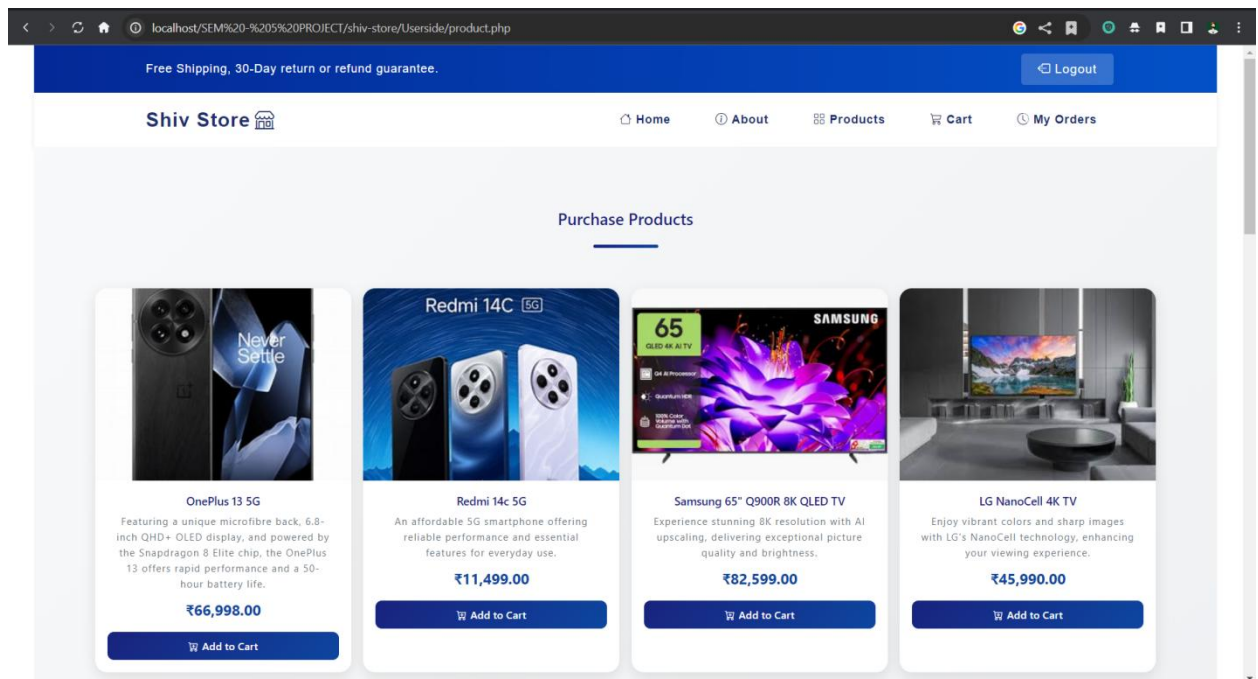

A screenshot of a web browser displaying a "User Sign In" form. The browser's address bar shows the URL: localhost/SEM%20-%205%20PROJECT/shiv-store/Userside/signin.php. The form is centered on a light blue background. It has a white box with a blue header "User Sign In". Inside the box, there are input fields for "Username" (containing "bhuva"), "Email Address" (containing "anand8888@gmail.com"), "Password" (masked with dots), "Phone Number" (containing "9099455012"), and "City" (containing "mehsana"). Below these fields is a blue "SIGN IN" button. At the bottom of the form box, it says "Already have an account? [Login](#)".

User-Login-Page

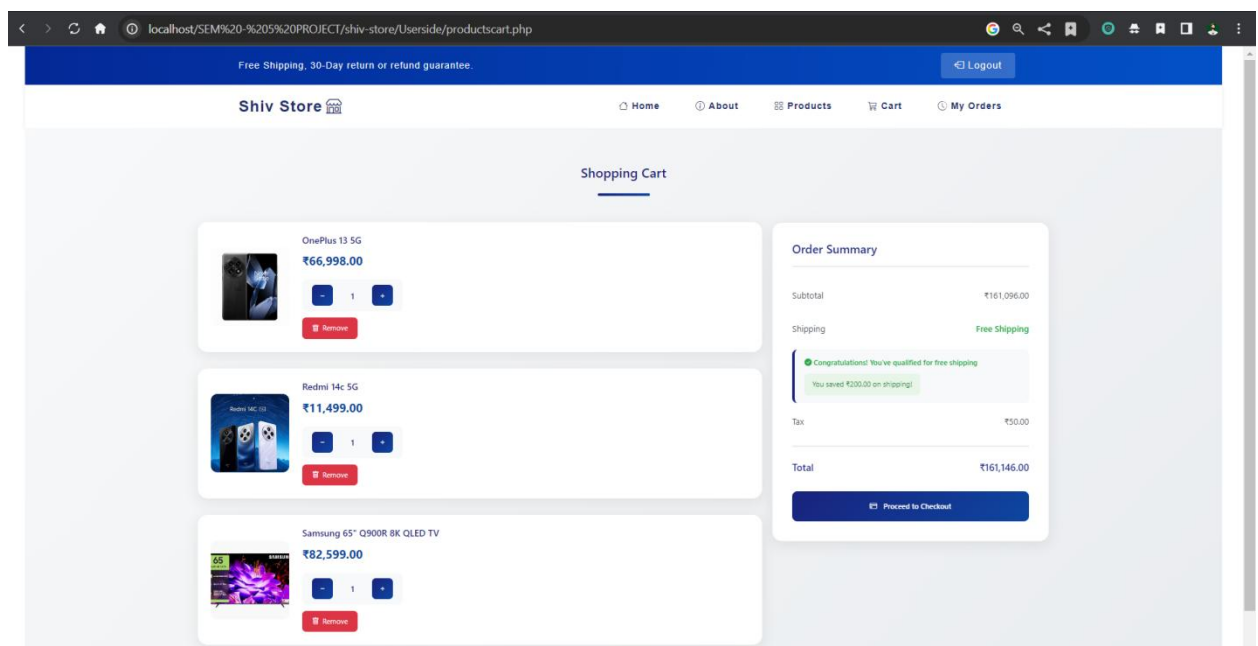

A screenshot of a web browser displaying a "Welcome" login page. The browser's address bar shows the URL: localhost/SEM%20-%205%20PROJECT/shiv-store/Userside/login.php. The page has a solid purple background. In the center is a white box with a blue header "Welcome". Below the header, it says "Please log in to continue". There are input fields for "Email" (containing "anand8888@gmail.com") and "Password" (masked with dots). Below these fields is a blue "Login" button. At the bottom of the box, it says "Don't have an account? [Register here](#)".

TESTING

“Testing is one type of process which checks that the system is working properly or not.”

➤ Specification Testing :-

- The specification testing is what program does in some various condition is.
- we check this system to give wrong username ,password, wrong data then system display message for input correct data.

➤ Unit Testing:-

- Unit testing is focused on verifying small portion of functionality. Unit testing is important part
- where each module and process of application is to be test by possible input sets and desired output.

POST IMPLEMENTATION REVIEW

- In this system all Requirements are fulfilled.
- The Admin can easily delete the record in efficient way.
- This system is user-friendly and easily understand.
- The performance level of users has improved.
- The new system needs less manpower, provides information at Time & saves data for document management.

FUTURE ENHANCEMENT

➤ Some are the expansion which we have thought of are:

- Try for to make system more user friendly.
- Improve some feature like bookmark add search and provide payment.

- After Admin Approved Users Order Confirmed.
